# 1st IBERIAN MEETING

on Non-Valvular Structural Interventions

Sana Lisboa Hotel - 20th and 21st October 2016

GRUPOPACIFICO
The power of meeting

Hemodynamic Section Members:
Travel expenses and hotel accommodation included
Contact in Spain: *Grupo Pacifico*
Jordi Medrano: *jmedrano@pacifico-meetings.com*

SOCIEDAD ESPAÑOLA DE CARDIOLOGÍA

Sección de Hemodinámica y Cardiología Intervencionista

apic ASSOCIAÇÃO PORTUGUESA DE INTERVENÇÃO CARDIOVASCULAR
Sociedade Portuguesa de Cardiologia

Percutaneous closure of paravalvular leaks

Septal ablation in HOCM

Left atrial appendage closure

Adult congenital interventions

And more…

Thursday, 20th

18h00 - Lets talk about…

- Registries
- Great questions for Iberian Studies
- Improving patient and medical community engagement

Friday, 21st

08h30 - Welcome address

09h00 - Percutaneous closure of paravalvular leaks

- Technical performance: step-by-step, image by image (with pitfalls and complications management)
- How to improve the results: patient selection, cardiac imaging and new devices

10h00 - Septal ablation in HOCM

- Implementation of programs for invasive management of HOCM. Portuguese and Spanish perspective
- Technical performance: step-by-step, image-by-image (with pitfalls and complications management)

10h45 - Coffee break

11h10 - Renal Denervation

- Current status and future advances

11h40 - The cardiologist in aortic and peripheral disease treatment

- Percutaneous revascularization in peripheral arterial disease
- Percutaneous revascularization in peripheral arterial disease
- Endovascular treatment of thoracic aortic disease

13h00 - Lunch

14h30 - Left atrial appendage closure

- Current scientific evidence and the road towards clinical guidelines
- Antithrombotic therapy post-procedure. How and how long?
- Intracardiac echocardiography for imaging guidance: the fall of anaesthesiology
- Technical performance: step-by-step, image-by-image (with pitfalls and complications management)

16h00 - Coffee break

16h30 - Adult congenital interventions

- Long term complications - drawing conclusionsfrom 2 decades of experience
- Percutaneous closure of arteriovenous fistulas. When and how?
- Percutaneous treatment for coarctation of the aorta. When and how?

18h00 - Closure
